RISD | SUMMER 2015 WEB DESIGN | IN-CLASS ASSIGNMENT 1

Place the folder containing this file under revision control using Git, then set up a remote version of the project via GitHub. As you follow the steps in this project, try to ensure that the story of how you develop this assignment is logical. Remember to keep your commit messages between 50 – 60 characters, to commit often, and to push often.

Use the outlining algorithm to mark up the following unordered content:

Artists

Salvador Dalí

Computer Engineers

Bookstore

Art

Engineering

Tim Berners-Lee

Wrap the following content in the proper HTML tags and add it underneath the appropriate heading you created in the previous slide.

Dalí was a skilled draftsman, best known for the striking and bizarre images in his surrealist work. His painterly skills are often attributed to the influence of Renaissance masters. His best-known work, The Persistence of Memory, was completed in August 1931. Dalí's expansive artistic répertoire included film, sculpture, and photography, in collaboration with a range of artists in a variety of media.

Italicize "The Persistence of Memory" in the content from the previous slide.

Add content to the `title` element you feel is appropriate, based on the page you just laid out.

Find pictures online of Tim Berners-Lee and Salvador Dalí, then include them in your document. Place the image wherever you feel is appropriate. Pay special attention to semantics in HTML.

Use the HTML5 validators to ensure your syntax is sound. Also, use the HTML5 outliner to verify your outlining algorithm makes sense.
